Vendor Breach Disclosure (VDP) as a Service

## What is VDP? Why do you require it?

On December 2nd, 2021, DHS Transportation Security Administration (TSA) announced new Security Directives for voluntary measures intended to strengthen cybersecurity; This was in response to the increasing cybersecurity threats, which include the following requirements:

1. Report cybersecurity incidents to CISA within 24 hours.
2. Designate a cybersecurity coordinator available to TSA and CISA around the clock.
3. Develop and implement a cybersecurity incident response plan to reduce the risk of operational disruption.

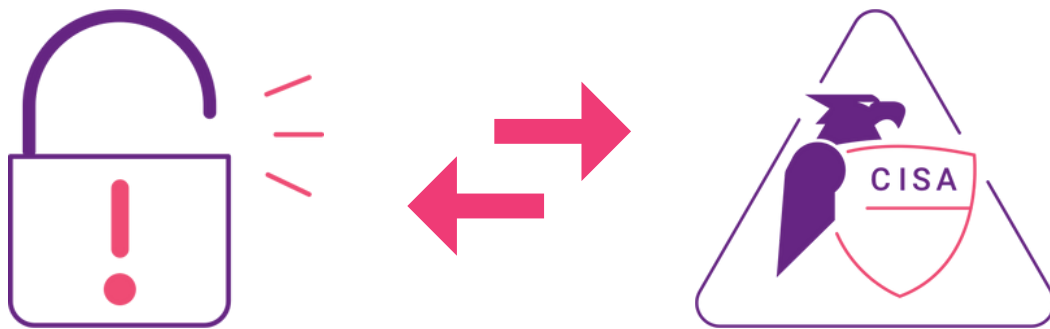

## Supply Chain Actionable intelligence to Act faster

Findings VDPaaS provides you with continuous intelligence on vendor breach disclosures in compliance for the US DHS VDP regulation.

This will allow your users to act faster based on actionable, real-time intelligence relevant to the user's supply chain, delivered by the only managed vendor disclosure service on the market.

## Easy-to-use and cost-effective rapid ROI

- Upload your vendor list to Findings to begin the VDPaaS process.
- The **Findings platform connects to the CISA reporting system** enabling end-to-end reports.
- Vendor Security incidents, once they occur, will trigger a real-time notification so you can react promptly and take action to protect your organization.

## Now available for all CyberUSA supported states:
